

Your 2019-2020 Formulary

Maricopa County OptumRx Coinsurance Prescription Plan

Effective July 1, 2019

For the most current list of covered medications or if you have questions:

Call the number on your member ID card.

Visit your plan's website on your member ID card to:

- Find a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.

What is a formulary?

A formulary is a list of prescribed medications chosen by your plan for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications approved by the U.S. Food and Drug Administration (FDA).

OptumRx® is guided by the Pharmacy and Therapeutics Committee (a group of doctors, nurses, and pharmacists) who review which medications will be covered, how well the drugs work, and overall value. They also make sure there are safe and covered options.

How do I use my formulary?

You and your doctor can use the formulary to help you choose the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply.

Bring this list with you when you see your doctor. If your medication is not listed here, please visit your plan's website or call the number on your member ID card.

What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by your employer or plan sponsor. This is how much you will pay when you fill a prescription.

When does the formulary change?

- Medications may move to a lower tier at any time.
- Medications may move to a higher tier when a generic equivalent becomes available.
- Medications may move to a higher tier or be excluded from coverage on July 1 of each year.

When a medication changes tiers, you may have to pay a different amount for that medication.

Why are some medications excluded from coverage?

A medication may be excluded from coverage under your prescription benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

What if I don't agree with a decision about an excluded medication?

You or your authorized representative and your doctor can ask for a coverage request by calling the number on your member ID card.

What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less. Once the patent for a brand-name medication ends, the FDA can approve a generic version with the same active ingredients.

What if my doctor writes a brand-name prescription?

If your doctor gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

What if I am taking a specialty medication?

Specialty medications are for rare or complex conditions and are usually higher-cost medications. Please note, not all specialty medications are listed in the formulary. BriovaRx®, the OptumRx specialty pharmacy, can provide most of your specialty medications. Call BriovaRx at **1-855-4BRIOVA (1-855-427-4682)** and have your prescriptions delivered right to your home or doctor's office.

Over-the-counter medications

An over-the-counter (OTC) medication may be the right treatment option for some conditions. Talk to your doctor about OTC options. Even though OTC medications may not be covered by your prescription benefit, they may cost less than a prescription medication.

Reading your formulary

The formulary gives you choices so you and your doctor can decide your best course of treatment. In this formulary, brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol).

Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost.

Drug Tier	Includes	Helpful Tips
Tier LC	\$ Lowest-cost generics	Use Tier LC drugs for the lowest out-of-pocket costs.
Tier 1	\$ Lower-cost generics and some brand-name	Use Tier 1 drugs for the lowest out-of-pocket costs.
Tier 2	\$\$ Mid-range cost preferred brand-name	Use Tier 2 drugs instead of Tier 3 to help reduce your out-of-pocket costs.
Tier 3	\$\$\$ Highest-cost non-preferred	Many Tier 3 drugs have lower-cost options in Tier 1 or 2. Ask your doctor if they could work for you.

Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan decides how these medications may be covered.

PA	Prior Authorization – Your doctor is required to give OptumRx more information to determine coverage.
PV	Preventive drugs – May have coverage and no copayments or coinsurance when health care reform requirements are met.
PV*	Preventive drugs – Available at \$0 if prior authorization is approved.
QL	Quantity Limit – Medication may be limited to a certain quantity.
SP	Specialty Medication – Medication is designated as specialty.
ST	Step Therapy – Must try lower-cost medication(s) before a higher-cost medication can be covered.
